Supply Chain Forecasting & Planning

Supply chain optimization has never been more important. The past two years have proven that. And to stay on top of your supply chain, to be able to optimize, minimize risks, and maximize profits, it takes data. With TransImpact's Supply Chain Forecasting & Planning products, your company gains the finest forecasting and demand planning solutions in the world. Each of our products can be hand-tailored to fit your business, your ERP, and your reporting requirements.

Products

- Demand Forecasting

With our 250+ world-leading forecasting formulas, TransImpact empowers you to forecast any data set, at any level of hierarchy, and then quickly perform unit of measure conversions.

- Inventory Planning

Improve your inventory forecasting, regardless of what size your company may be. Implementing effective TransImpact Inventory Planning can bring you up to 99% accuracy.

- Sales & Operations Planning

With Sales & Operations Planning, optimize your demand plan through exception management reporting and "what if" scenarios.
