B2B Check Printing That Pays for Itself

Viewpost® Check Printing and Payment Optimization services eliminate costly in-house check printing processes while generating rebates that often exceed 30X to 40X the cost of check printing and mailing services.* Our proprietary technology converts checks into virtual credit card payments in real-time, creating rebates from checks converted and delivered to suppliers via card. Best of all, Viewpost does all the work for you.
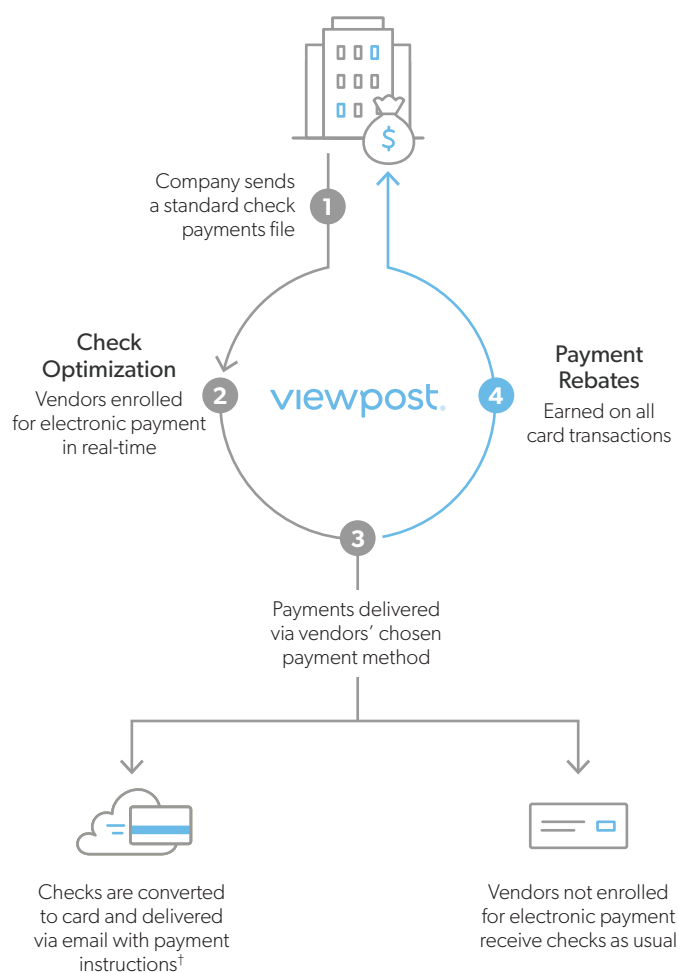

Big Savings, More Revenue

Check Optimization is a surprisingly simple and effective service that delivers real-time conversion of supplier checks into rebate-generating virtual card payments. In addition to eliminating tedious and costly check printing and mailing operations, Check Printing and Optimization enables your business to capture revenue that would have otherwise gone out with the mail.

No Extra Effort

Whether you currently print your own checks or outsource check printing, there's little effort required to take advantage of Check Optimization. Simply submit a standard check file, and if suppliers opt to accept card, their payments will be delivered as virtual cards. The conversion occurs automatically and requires no business process or accounting changes by the customer.

- Fast and simple to implement

- No change in payment or reconciliation processes

- Relieves AP teams of check printing responsibilities and generates valuable rebates for you organization

How Check Optimization Works

1 Company sends a standard check payments file

2 Check Optimization — Vendors enrolled for electronic payment in real-time

4 Payment Rebates — Earned on all card transactions

3 Payments delivered via vendors' chosen payment method

Checks are converted to card and delivered via email with payment instructions[†]

Vendors not enrolled for electronic payment receive checks as usual

[†] For vendors requesting assistance processing payments by phone, via interactive voice response systems, or through payment portals, agents will assist to ensure card payments are processed efficiently.

*Excluding postage.
